

# Dream Eco Chain - a revolutionary new concept in snow chains

## Dream Eco Chain: Re-inventing the snow chain

Dream Eco Chain is unlike any other snow chain on the market today. Its simple groundbreaking design allows for an installation time of less than 30 seconds without moving the vehicle and without the usual hassles of installing typical snow chains that require more time and effort in freezing weather conditions.

Dream Eco Chain is made of the toughest and highest quality materials to last 10 times longer than other snow chains. The unique coil roller design not only offers superior traction and durability, it also eliminates damages to road surfaces. The ease of installation there is no need to store and change snow/studded tires every season.

This means big savings in gas, tires, and labor for commercial operations such as taxi companies, delivery operations, trucking firms, bus companies, and for the everyday user.

Dream Eco Chain performs like a dream under all kinds of snowy, icy conditions, keeping you always safe and in control.

**Install in 3 easy steps in less than 30 seconds**

1. Connect chain units.
2. Drape chain over tire.
3. Connect bottom arms.

## The difference is in the details

### Protector pads

Rotating rubber pads assure snug fit and protect tires from wear, and wheels from scratches.

### Simple, rugged slide lock mechanism

Push down on the J-shaped lock pin to engage or release the lock rod from the sleeve. The lock rod is slotted to allow for precise adjustment.
